

ASSOCIATE DATA SCIENTIST

ABHYANSH SHRIVASTAVA

+91 9336925407 | shrivastavaabhyansh91@gmail.com | <https://www.linkedin.com/in/abhyansh-shrivastava-data-scientist/>

PROFESSIONAL SUMMARY

Associate Data Scientist with 2+ years of experience in designing, developing, and deploying Machine Learning and Deep Learning solutions. Proficient in Python, SQL, TensorFlow, Scikit-Learn, and data analytics with hands-on experience in predictive modeling, feature engineering, ETL pipelines, and model deployment. Skilled at building scalable AI solutions, optimizing model performance, and collaborating with cross-functional teams to deliver business-driven outcomes.

PROFESSIONAL EXPERIENCE

Associate Data Scientist | Kapnet Services & Solutions Pvt. Ltd.

19 June 2024 – Present

- Designed, built, and evaluated end-to-end Machine Learning and Deep Learning pipelines using Python, Scikit-Learn, TensorFlow, and Keras.
- Implemented statistical data preprocessing, outlier detection, and advanced feature engineering pipelines, driving a 15% increase in predictive model performance metrics (F1-score & ROC-AUC).
- Optimized model inference performance and data processing bottlenecks, improving query response latency and streamlining real-time data flow.
- Collaborated with cross-functional technical teams across full-stack data product deployments from ETL pipeline development to deployment.
- Integrated version control, data pipeline monitoring, and deployment workflows using Git, GitHub, Docker, and SQL databases.

PROJECTS

Fraud Detection in Online Transactions | *Python, TensorFlow, Keras, Scikit-Learn, Pandas, NumPy*

- Built an enterprise-grade machine learning classification pipeline to detect real-time fraudulent transactions using Logistic Regression, Random Forest, and Deep Neural Networks.
- Executed exploratory data analysis (EDA), synthetic oversampling (SMOTE), and domain-specific feature engineering on transaction amounts, IP risk scores, and device trust scores to capture complex fraud patterns.
- Evaluated models using Precision, Recall, F1-score, and ROC-AUC metrics, optimizing detection of high-risk transactions while reducing false positive rates by 22%.

Healthcare Readmission Analysis | *Python, TensorFlow, Keras, Deep Learning, Scikit-Learn, Streamlit*

- Developed a Deep Artificial Neural Network (ANN) using TensorFlow/Keras to predict 30-day hospital patient readmissions from clinical electronic health records.
- Implemented Dropout regularization, Batch Normalization, and Early Stopping strategies to effectively eliminate overfitting and maximize generalization accuracy.
- Designed a Streamlit dashboard interface enabling healthcare providers to input patient parameters and obtain real-time risk scores with actionable diagnostic feedback.

SKILLS

- Core Programming & Databases:** Python, SQL, MySQL, PostgreSQL
- Machine Learning & Deep Learning:** Regression, Classification, Clustering (K-Means), Decision Trees, Random Forest, Scikit-Learn, TensorFlow, Keras, Feature Engineering, Model Evaluation
- Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA)
- Deployment & Tools:** Streamlit, Git, GitHub, Docker, ETL Pipelines
- Soft Skills & Methodologies:** Problem-Solving, Team Collaboration, Quick Learner, Data-Driven Decision Making

EDUCATION

Bachelor of Technology in Computer Science & Engineering (B.Tech CSE) Jaypee University of Engineering and Technology, Guna	2020 – 2024
Intermediate (Class XII) Shri Vinayak International Senior Secondary School, Orai	2019 – 2020

CERTIFICATIONS

- Data Science Trainee — Career 247**
Engaged in intensive Data Science training focusing on the full project lifecycle, Advanced SQL (MySQL), and Exploratory Data Analysis (EDA) using Python, NumPy, and Pandas.
- Data Science Training — Internshala**
Comprehensive training covering Python programming and Predictive Analytics Modeling.
